

TVMDL's Diagnostic Tests Cater to Veterinarians

The Texas A&M Veterinary Medical Diagnostic Laboratory is a one-stop shop for testing, allowing you to receive interpreted results that are accurate, timely and affordable.

Our selection of diagnostic assays allows you to choose a complete workup or individual tests to suit your client's needs, whether symptoms point to a respiratory problem, neurologic issue, or other confounding symptoms.

Veterinarians send their tests to TVMDL because we work for you.

**Protecting animal and human health
through diagnostics**

tvmdl.tamu.edu

No matter the symptom, TVMDL has a test to diagnose the problem.

*All tests may not be suitable in all circumstances or presentations.
Please contact TVMDL for a diagnostic consultation.*

Neurologic work up:

(Rabies should always be considered in neurologic cases)

- Equine encephalitis screen
 - VEE-IgM ELISA
 - WEE-IgM ELISA
 - EEE-IgM ELISA
 - WNV IgM ELISA
- Equine herpesvirus-1 PCR (rhinopneumonitis)
- Equine protozoal myeloencephalitis
- Virus isolation
- CSF fluid analysis

Respiratory work up:

- Equine influenza (A1, A2, KY, AK) (HI)
- Cytology and bacterial cultures on nasal/tracheal swabs or tracheal wash
- Influenza matrix PCR
- Virus isolation on nasal/tracheal swabs
