

Mission and scope

The mission of the Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) is to promote animal health and protect agricultural, companion animal and public health in Texas – and beyond – through excellence in veterinary diagnostic services.

We are committed to providing affordable, rapid, accurate, state-of-the-art diagnostic testing, primarily to veterinarians, animal owners and government agencies.

Protecting animal and human health
through diagnostics

The scope of TVMDL's work

- Operates four laboratories strategically located in the state's most concentrated areas for livestock and poultry production.
- Performs testing for intrastate, interstate and international movement of animals and products.
- Develops and implements cutting-edge technologies and new diagnostic assays to meet industry needs.
- Offers consultation and interpretive services for more accurate diagnoses.
- Serves state and federal agencies by providing timely, pertinent, and accurate test results that are essential for early detection and control of disease.
- Acts as the backbone of a statewide, regional and global animal and zoonotic disease surveillance system that protects the state's multi-billion-dollar livestock industry as well as the companion animal and public health sectors.
