

Informal email request for quotes 8/16/15

I have two locations that are in need of a good data connection. I am trying to find out if your company offers service in these areas (preliminary review looks promising) I am including the location addresses below. In both cases I am interested in seeing what options are available as they currently utilize T1 connections. So an equivalent or better connection is of interest whether it is copper or fiber based.

Location 1: 1162 Sarah Dewitt Dr, Gonzales, TX 78629

Location 2: 635 Malone Drive Center, TX 75935

Thanks,
