

Caprine Arthritis-Encephalitis

TVMDL offers an Agar gel immunodiffusion assay (AGID) and an enzyme-linked immunosorbent assay (ELISA) for Caprine Arthritis-Encephalitis (CAE) testing. The CAE virus infection is often subclinical, decreasing the lifetime productivity of dairy goats and barring exportation.

Caprine Arthritis-Encephalitis AGID

SPECIMEN: 1 cc serum

PRICE: \$7.50

TURNAROUND: Performed in College Station Monday-Thursday, with results in one business day if received by 1 p.m. Tests batched if 2 or fewer specimens.

Caprine Arthritis-Encephalitis ELISA

SPECIMEN: 1 cc serum

PRICE: \$9.00 for the first 10 animals; \$8.00 for each additional on the same accession.

TURNAROUND: Performed in College Station, with results in one business day if received by 10:30 a.m. Tests batched once or twice a week.
