

TEXAS A&M
TVMDL
VETERINARY MEDICAL
DIAGNOSTIC LABORATORY

Protecting animal and human health through diagnostics

About the Texas A&M Veterinary Medical Diagnostic Laboratory

By testing hundreds of specimens from around the world every business day, TVMDL contributes significantly to protecting the health of livestock, poultry, companion animals, exotic animals, racing animals, and wildlife. TVMDL delivers timely, pertinent, and accurate diagnostic test results that are essential for early detection and control of disease.

TVMDL offers a wide range of state-of-the-art diagnostic tests that deliver accurate results promptly and affordably. Veterinarians, animal owners, industries, and government agencies depend on our expertise to help preserve animal and public health. In addition to a Drug Testing Laboratory, TVMDL boasts sections focused on:

- Bacteriology
- Clinical Pathology
- Endocrinology
- Histopathology
- Molecular Diagnostics
- Parasitology
- Research & Development
- Serology
- Toxicology
- Virology

TVMDL is a Level I Laboratory in the National Animal Health Laboratory Network, a group of state and regional laboratories designed to provide a nationwide surge-testing, response, and recovery capacity in the event of an animal disease outbreak.

A member of The Texas A&M University System and an agency of Texas A&M AgriLife, TVMDL has four laboratories strategically located to better serve the state's livestock and poultry industries.

TVMDL is accredited by the American Association of Veterinary Laboratory Diagnosticians and has earned ISO 17025 accreditation from the American Association for Laboratory Accreditation (A2LA) Competition Animal Drug Testing Laboratory Accreditation Program and is accredited by the Racing Medication and Testing Consortium.

Our primary customers are animal owners, veterinarians, and state and federal agencies — including the Texas Racing Commission, the Texas Animal Health Commission, Texas Parks and Wildlife Department, Texas Department of Criminal Justice, and the U.S. Department of Agriculture.

TVMDL is among the busiest diagnostic laboratories in the United States.

650+ submissions received each day from clients across Texas, in neighboring states, and around the world

TVMDL is the front line of both animal and human health, detecting zoonotic diseases like anthrax and emerging infectious diseases like West Nile virus and Chagas.

200,000+ cases are completed annually — serving the livestock industry and companion animals

99% of the tests we run benefit these species:

- Dogs
- Poultry
- Horses
- Swine
- Cattle
- Goats
- Cats
- Sheep
- Exotic animals
- Deer

TVMDL protects animal and human health through diagnostics.

\$11.4 billion value of the Texas livestock industry we help protect, acting as the backbone of a statewide, regional, and global animal and zoonotic disease surveillance system. We also protect the state's companion animal and public health sectors.

TVMDL performs essential testing that allows owners to legally move commercial animals and animal products between states and to export them to other nations.

600+ state-of-the-art diagnostic tests offered through two full-service laboratories and two poultry laboratories

25 staff veterinarians with doctoral degrees, board certifications, or both, ready to answer your questions about diagnostics

With laboratories strategically located, TVMDL is uniquely positioned to serve the animal industries of Texas.
